

Course: Learn to write an attractive title and abstract

Title and abstract are in an important role in grant applications and scientific publications. Evaluators and reviewers get the first impression by reading them. However, it is good to know that title and abstract should be written in a different way to grant applications and scientific publications. In scientific publication attention should also be paid to keywords.

Course objectives: This course aims to increase possibilities to write

- grant applications which will be funded
- scientific publications which will be discovered, cited and will get visibility

Language: English

Target group: The course is aimed at PhD students and junior researchers.

Time: Tuesday 11th September 2018 at 16.15-20.00

Place: TA21L143

Registration: by 3rd September 2018 [here](#).

Program:
