

# Change in DWA Services: Single Service Unit = FBMM

Dear All,

Starting from April 2, 2024, after Easter,

**DWA services at Kontinkangas will be exclusively provided at the FBMM DWA facilities.**

**This service concept will remain effective until further notice.**

For users of the Kieppi DWA-unit, please note that you must transport the instruments to and from the FBMM DWA-unit room F025 yourself.

The autoclave is in room F043A, where autoclavable items should be taken.

Autoclaved waste should be disposed of in room F037B. Clean waste bins and bags are also available here.

Autoclaving schedules:

Liquid items at 10:00 AM,

final autoclaving of dry items at 1:00 PM.

**BSL2 waste (RV group and virus)** will continue to be sterilized at the Kieppi DWA unit. If you intend to bring BSL2 waste for autoclaving on either Tuesday or Thursday, please notify us by 2:00 PM the previous day via email at [DWA-valinehuolto@oulu.fi](mailto:DWA-valinehuolto@oulu.fi)

As the space in DWA - unit is limited, dishes from laboratories in the Aapistie 5 area will be transported to the FBMM side according to the following **plan on specific weekdays**. Generally, clean dishes will be available for pickup back to the laboratories the next working day. Please collect the clean dishes within two days at the latest.

**Transportation of dishes to the FBMM DWA unit starting from April 2, 2024.  
Check your own laboratory's exportation day!**

Laboratories	Mon	Tue	Wed	Thu	Fri
FBMM + B + courses	x	x	x	x	x
DIPP		x			
FAFY labs		x			
FAFY cell			x		
CRC	x		x		x
Kieppi 4th floor	x			x	
GTL	x				
Kieppi 2nd floor			x		
OiPat			x		
EM				x	

You can reach the personnel via email: [DWA-valinehuolto@oulu.fi](mailto:DWA-valinehuolto@oulu.fi)

This change in service concept is being implemented so that the Kontinkangas DWA - unit can continue to serve as a high-quality and reliable facility, despite a reduction in staff.
