

# Washing and disinfection in DWA facilities in Kieppi 2<sup>nd</sup> floor

Bring dirty dishes every day to DWA room 237B

- Users rinse the dishes before placing them for washing (Gels with hot water!)
- Users remove marker writings, tapes, and glues.

- Please do not leave dishes for washing that may contain dyes, chemicals, or are so stubborn that they cannot be cleaned during washing. (May mess up or ruin the entire batch of dishes)
  - Please dispose of broken dishes in the laboratory.

- The groups collect clean dishes daily from the room 236B (the space is small, so please collect your own).
- Cleaning of cell culture cabinets is always arranged with DWA staff or booked on the cleaning calendar (calendar in room 236B, 1 cabinet/day).
  - Cabinets cannot not be brought for cleaning unless agreed with personnel (space is limited).
- If anything is unclear, please ask for assistance from DWA staff 😊
