[Submit Your Abstract](#)

Registrations and Abstract Submissions to IVBM2018 are now welcome!

Best abstracts, illuminating the newest discoveries in vascular biology, will be selected for short talks in the program and/or awarded with poster prizes!

As the premier international event in vascular biology, IVBM2018 provides a unique opportunity for the international biomedical community to unite and exchange information, identify new directions, and support the next generation of scientists in vascular medicine. Organized biennially, the IVBM is widely recognized as a showcase for cutting edge basic and translational research in vascular biology.

We look forward to seeing you all in 2018 in Helsinki!

The organizers

Kari Alitalo, Christer Betsholtz, Lena Claesson-Welsh, Jozef Dulak, Pipsa Saharinen & Seppo Ylä-Herttuala
University of Helsinki and Wihuri Research Institute

Book Your Stay in Helsinki

HELSINKI & THE NORDIC SUMMER

Helsinki is a major Scandinavian capital between the East and the West with an enfolded seafront and archipelago. It provides a beautiful mixture of refreshing nature and contemporary city life, brimming with Scandinavian architecture and culture.

Helsinki is a walkable city that also offers an efficient public transportation network. In early June, the city sees more than 18 hours of daylight, which extends to the Nordic white nights when the sun sets only for a moment.

The Helsinki Airport (IATA code: HEL) is an award-winning airport with frequent connections to many global destinations.

For more information on visiting Helsinki, take a look at the [12 top reasons to fall in love with Helsinki](#).
