

Are you an **entomologist**? Do you work with or collect insect trait data? **Take our short survey about insect traits!**

An Insect Trait Working group seeks to establish a distributed network of standardized data collection to allow for tests of insect trait variation and address many ecological questions. This survey will help us understand the interests and needs of the entomological community working on trait data.

**Insect Trait Working Group:**

Kayla Perry, **Nathan Jay Baker**, Deshae Dillard, Eliza Grames, Jessica Kansman, Elinor Lichtenberg, Karl Roeder, Vaughn Shirey, Ellen Welti
