

CSL 2026 Research Acceleration Initiative Process

No obligation for registered organizations to submit applications

No limitation on number of abstracts each registered organization can submit

Agreement Guidance

Separate funding agreements will be negotiated for each project which reflect the nature of the project, nature of funding and support, and the contributions of both parties

Under these negotiated agreements, CSL will be granted certain rights of interest to the program results for further R&D and/or commercialization

Funding agreements will typically include the following terms (although CSL may propose other conditions depending on the nature of the project):

- *Research organization will generally own results arising under the project*
 - CSL would typically own any results which relate to proprietary CSL products or materials contributed to the project or may seek joint-ownership of results to which it has made a significant contribution (e.g. protein or antibody discovery and engineering activities).
 - The RAI is designed to accelerate the translation of novel discoveries made by research scientists – for proposals outside this scope, we may propose that projects be progressed outside the RAI
- *CSL will be granted an exclusive option to negotiate an exclusive, worldwide licence*
- *CSL supports publication of research outcomes*

Further details on agreement terms can be provided on request
