

Researchers and startups, join a free online event on 27 January

Funding journey: From research to commercialization

Health Capital Helsinki is arranging an online event together with BioInnovation Institute (BII), based in Denmark, on Thursday 27 January, 11:00-15:00 (EET).

Receiving funding and even finding all the various funding opportunities are far from easy. And what do the funding institutions look for when they explore which early-stage life-science projects to fund?

These questions will be addressed by key players in the Nordic life science ecosystem during an online event with a unique possibility to book 1:1 meetings with the presenters from The Novo Nordisk Foundation, BioInnovation Institute and EIR Ventures.

The CEO of the biotech start-up Twelve Bio, Stefano Stella, will also share Twelve Bio's journey towards raising a large Series A investment. His experiences serve as inspiration for others who dream about following an entrepreneurial path in life sciences.

Schedule

Date: Thursday 27 January 2022

Time: 11.00–15.00 Helsinki, EET

Content: 2 hours of presentations, 2 hours reserved for 1:1 meetings

The BioInnovation Institute Foundation

The BioInnovation Institute Foundation (BII) is an international non-profit foundation supported by the Novo Nordisk Foundation. BII operates an incubator to accelerate world-class life science innovation that drives the development of new solutions by early-stage life science start-ups for the benefit of people and society.

With continued positive development, The Novo Nordisk Foundation can provide up to EUR 470 (3,5 mia. DKK) to BII over 10 years to support early-stage life science projects and start-ups for the benefit of people and society.

Since the inauguration of BII in November 2018, BII has awarded 35 million euros to 68 high-growth start-up companies.
