

**A post-doctoral position open at the Biomedicine/Pharmacology and Toxicology, Medical Faculty, University of Oulu, in the research group of Professor Jukka Hakkola**

The Hakkola group works in the field of Metabolic Pharmacology. For more information see <http://www.oulu.fi/mrc/node/19980>. We are seeking a talented and motivated candidate to fill an Academy of Finland funded four year post-doctoral position. The post doc will work in the project investigating role of nuclear receptor PXR in nutritional signaling and metabolic health.

The qualified applicant should hold a doctoral degree in a suitable area and have experience in the molecular and cell biology. Experience on mouse *in vivo* experiments and liver biology is an advantage.

The position will be available from 1<sup>st</sup> of September 2015. The salary is based on the university salary system and will be on the demand level 5. For further information contact professor Jukka Hakkola ([jukka.hakkola@oulu.fi](mailto:jukka.hakkola@oulu.fi)).

To apply send your application to professor Jukka Hakkola ([jukka.hakkola@oulu.fi](mailto:jukka.hakkola@oulu.fi)) latest 31<sup>st</sup> July 2015. Please include your CV and a motivation letter describing your relevant experience.
