

A post-doctoral position will be open at the Obstetrics and Gynecology and Reproductive Medicine group /Medical Research Center/Medical Faculty, University of Oulu, in the research group of Associate Professor Terhi Piltonen.

Our group is working on endometrial pathologies and female endocrine and metabolic derangements that relate to female fertility. We have special interest for PCOS and endometriosis. For more information see <http://www.oulu.fi/mrc/research-groups/piltonen>

We are seeking a talented and motivated candidate to fill a Sigrid Juselius grant post-doc position. We have 2-year starting grant for the position. The post doc work will focus on endometrial and placental functions and metabolic health in women with PCOS. A highly-motivated candidate with a keen interest in using a wide range of biochemical/biophysical methods for understanding molecular mechanisms of cell biology will be an advantage. The project details will be planned together with the successful applicant based on their expertise and interests.

The position will be available from 1st of September 2017. The salary will be played as grant according to Sigrid Juselius foundation recommendations.

To apply send your application to Associate Professor Terhi Piltonen (terhi.piltonen@oulu.fi) latest 30th of June 2017 (pl name email heading and attachments POST-DOC APPLICATION_[YOURNAME]). Please include your CV with significant publication lists, a motivation letter describing your relevant experience and expertise and description of your future plans.
