

KIEPPI SEMINAR SERIES

PROGRAM FOR FALL 2007

Contributing research units: Biocenter Oulu (BCO) Kieppi Res. Institution
Clinical Research Center (CRC)
Dept. of Microbiology

Place of the seminar: Hall 134B

Time: 15.00-16.00

27.9. Ilkka Pietilä (BCO): "Control of urogenital system development by the Wnt signaling pathway"

25.10. Riitta Palovuori (BCO): "Generation of transgenic mouse embryonic stem cells by retroviral transduction"

Riikka Säynäjäkangas (Microbiology): "Differential gene expression in CD45+ para-aortic cells from chicken embryos"

15.11. Hanna Alaoja (CRC): "Brain protection in heart surgery and stem cells in myocardial infarction - the chronic porcine models in Oulu"

LT Johanna Uusimaa (CRC): "Clinical phenotypes and molecular genetics of mitochondrial diseases in childhood"

29.11. Riikka Wirkkalan (BCO): "Compartmentalization of Tie2 signaling in vascular endothelial cells"

Johanna Annunen-Rasila (CRC): "Cell phenotype changes in mitochondrial diseases"
