

**UNIVERSITY  
OF OULU**

## **Instructions for laboratory glass waste collection**

Laboratory glass waste (e.g. beakers, erlenmeyer flasks) is emptied in the normal waste container “polttokelainen” or “sekajäte” at outside waste collection point. Laboratory glass waste should not be mixed with normal glass waste due to their different melting properties. In laboratory premises there are dedicated waste bins for broken glassware, which are not emptied by the cleaning personnel.
