

Next is Now

Meet the NextSeq™ 500 Sequencing System

Introducing NextSeq™ 500

Next Generation Sequencing is transforming our understanding of genomics, driving new research, and enabling new discoveries in biology. Now it's easier than ever to be a part of this scientific revolution.

Illumina has a complete portfolio of next-generation sequencing systems for every study, every lab, from MiSeq to HiSeq and including our latest addition, the NextSeq™ 500 system—the desktop sequencing system offering everyday high-throughput sequencing at a price that makes sense.

Next is Now!

Please join us at this mini-seminar to learn about the breadth of our product offering, hear about applications, and get your questions answered about our technology, our kits or about the optimal solution for your particular project.

Location: Oulu University
Linnanmaa campus area
seminar room KE251
90570 Oulu, Finland

Date: Tuesday 25.3.2014

Time: 14.00 – 16.00

Registration: Please email Reija Laitinen:
rlaitinen@illumina.com

SEMINAR SCHEDULE

Welcome

45 mins

Introduction to Illumina's new Next Generation Sequencing Portfolio

Reija Laitinen, Illumina
Territory Account Manager,
Finland and Baltic countries

45 mins

Applications on Illumina's Next Generation Sequencing platforms with a perspective outlook on the new portfolio

Pernille Albertus, Illumina
Field Marketing Specialist,
Northern Europe

30 mins

Questions and Answers session with open discussion

Coffee/Tea will be provided
