

**Job Description:**

Laboratory Personnel (4 to 8 vacancies)

**Company:**

Paras Biopharmaceuticals Finland Oy, a biopharma production and development company based in Oulu has an immediate need for 4-8 highly motivated people to join their existing fermentation and protein purification teams for the production of biopharmaceuticals. Company is also looking for people with experience in formulation, molecular biology, biochemistry, analytics, pre-clinical assessment (medical use)

**Qualifications:**

Candidates with any of the following qualifications in a relevant field of study will be considered

- Bachelor's degree
- Master's degree
- PhD with experience

**Experience:**

No previous industry experience is required but applicants with significant experience or a higher degree can be also considered for other suitable positions in the company. Suitable training for the roles will be provided and will offer potential candidates a fantastic opportunity to learn new skills.

**Required Skills:**

The ideal candidates will be self-motivated, have excellent organisation and communication skills, and be able to function in a fast-paced environment, multi-task and handle multiple responsibilities. Both English and Finnish are used in the company.

**Job Location:**

Oulu - Kiviharjunlenkki 2, 90220
